

Hundreds of prominent fleets have **tested and deployed** Halo across the US and Canada

Maintaining optimal tire pressure is necessary given today's high tire, fuel, and labor costs, but is near impossible to maintain manually. Aperia's fleet customers rely on Halo to boost efficiency and tire life, while eliminating preventable tire blow-outs.

Quick Facts

- **\$2,200+** lost annually per T/T due to improper tire pressure*
- **1 blow-out** a year per tractor/trailer is due specifically to tire under-inflation
- **90% of tire failures** are caused by excessive heating from under-inflation
- **21% of vehicle-defect truck crashes** are due to tire failure
- **1.4%** fuel efficiency decrease*
- **12%** tire life reduction*
