

NFI INDUSTRIES CUSTOMER SUCCESS

NFI LEADS IN SAFETY, SUSTAINABILITY & SUPPLY CHAIN EXCELLENCE

NFI is a fully integrated North American supply chain solutions provider headquartered in Camden, NJ. Its services span dedicated transportation, warehousing and distribution, eCommerce fulfillment, brokerage, transportation management, port drayage, intermodal, global logistics, and industrial real estate. NFI operates a fleet of 5,000 tractors and 14,000 trailers and ranks 7th among dedicated contract carriers in North America in 2024. Recognized for safety and sustainability, NFI has received multiple EPA SmartWay Excellence Awards for leadership in freight efficiency. The company is also a top intermodal and drayage provider, operating at major ports and rail hubs across the U.S. and Canada.

NFI DEPLOYS HALO TIRE MANAGEMENT

NFI deployed Halo Tire Management technology in January of 2024 and quickly experienced incredible gains contributing to enhanced fleet safety, efficiency, and profitability.

TIRE MAINTENANCE BURDEN ALLEVIATED

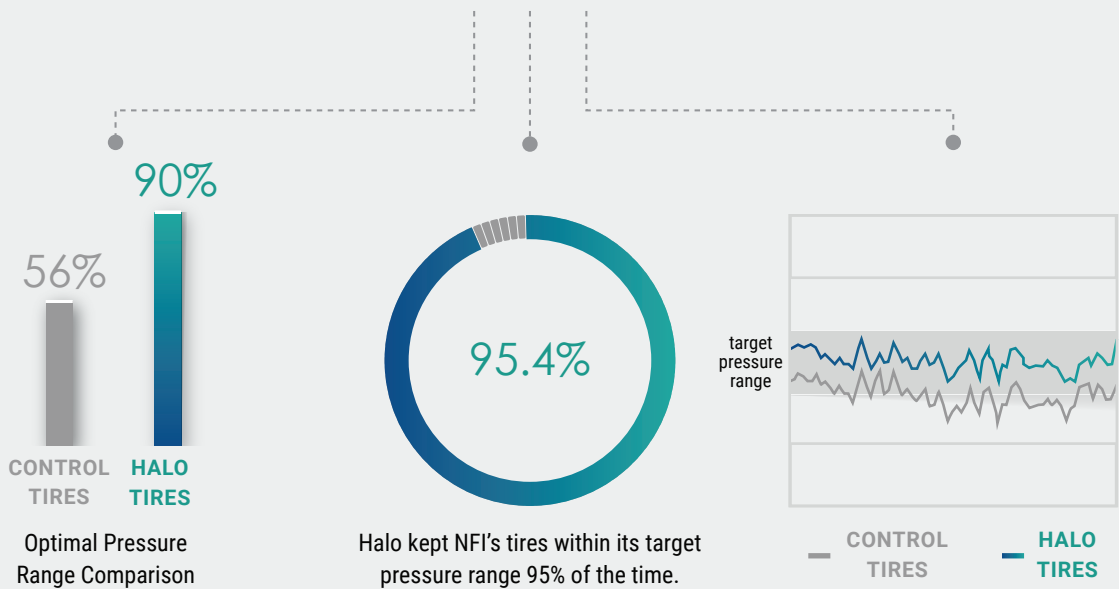

NFI PILOT: HALO FIXES UNDERINFLATION & FIGHTS LEAKS

During NFI's pilot, non-Halo tires generated 92 alerts per 100 tires, while Halo-equipped tires produced just 43 alerts per 100 tires—a reduction of over 50%. This significant decrease highlights Halo's effectiveness in eliminating underinflation and addressing leaks. As a result, NFI experienced far fewer alerts and could focus its resources only on the specific tires that required attention.

Halo-equipped tires alert **53%** less than non-Halo control tires.

Halo Keeps Tires within Target CIP

Halo helps NFI cut down on alerts, focusing only on tires that need attention. With optimal inflation and streamlined insights, NFI saves time, resources, and enhances fleet safety.
