

TRAILER SPEC

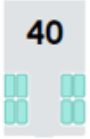

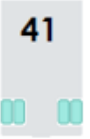

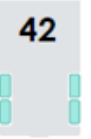

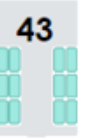

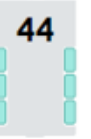

Please make sure that for each variation of vehicle a new spec is filled out.

For example, if you have 5 single axle trailers and 5 dual axle trailers, you should fill in two spec sheets.~

HOW TO COMPLETE THE TRAILER SPEC SECTIONS

CONFIGURATION MAKE AND MODEL

Enter the trailer make and model.

QUANTITY OF TRAILERS

This lets us know how many trailers have this spec so we ship the correct quantities to you.

PLEASE LIST ALL MODEL YEARS

The model years help us select the correct power harness. We may follow up if there are late model trailers.

CONFIGURATION NUMBER

This is the axle and tire configuration for the vehicles. Select the configuration number on the first page that matches the trailer. Choosing the correct trailer configuration ensures that we ship the correct sensor kits.

TRAILER TYPE

Selecting the proper Trailer type will allow our team to provide installation recommendations specific to your vehicle and trailer configuration.

5 PIN ABS CONNECTOR AVAILABILITY

The primary trailer power harness option is using a plug and play Y-harness at the industry standard ABS 5-PIN connector. This 5-PIN connector is typically located near the ABS ECU under the trailer and is present on the overwhelming majority of trailers manufactured after it became standard around 1998. If this connector is not present or accessible then we will provide a power harness to allow us to connect to a junction box on the vehicle. If you are not able to locate the 5-PIN connector or cannot access the vehicle to gather this information, please select "Unknown" and send the remaining specs.

WHEEL DIAMETER

Please provide the wheel diameter of the vehicle. This will help to ensure we send the correct hose lengths.

WHEEL MATERIAL & DESIGN

Select the wheel material and design from the options provided or write in the material/design that best matches your configuration. This information will help to ensure we send the correct hose lengths.

TARGET TIRE PRESSURES AND RIM RATINGS

Please provide the Target Cold Inflation Pressure for the axles.

HUBCAP MANUFACTURER AND PART NUMBER

In order to properly determine the appropriate bracket and mounting hardware for your trailer, please specify the Hubcap manufacturer and any available part numbers.

ADDITIONAL TECHNOLOGIES AND INFORMATION

Please provide any information regarding additional technologies currently in use on any or all of the trailers. If you feel that additional information or specifications would be relevant, please include in the space provided. Some technologies require special parts to integrate with the Halo system or are not compatible.

Please email a copy of your completed form to sales@aperiatech.com.
